

ERASMUS+ SHOWS NEW OPPORTUNITIES

advertising & economist technicians' internships in Hungary '2023

The Erasmus+ programme includes internships in companies with an appropriate business profile, improving language skills in the business environment and everyday life, developing soft skills and getting to know the culture of the host country. Here are our actions:

LANGUAGE PREPARATION

Preparation for the mobility included participation in language courses on the OLS platform (Online Support System). We've taken online tests to determine our language level and then went through a 4-stage 20-hour English language course.

LOGO

During preparation period before coming to Budapest we've designed LOGO for this particular Erasmus+ project. It's colors correspond to the hungarian flag and the picture shows building of parliament in Budapest.

SOCIAL SKILLS PREPARATION

Our project also includes key competence development training. Before mobility we've got to know each other, we've run communication skills and teamwork training. These trainings are supposed to help us in smooth adaptability in a workplace.

ZESPÓŁ SZKÓŁ nr 5

im. Stefana Kisielewskiego

BUDAPEST, HUNGARY

Jó napot! Köszönöm, jól vagyok.

DISCOVERING THE CITY

The first days were a real rollercoaster. Getting to know the public transport system and not getting lost seemed to be a challenge. On the third day "EUREKA!" everything became simple.

LIFE IS A TRAVELLING TO THE EDGE OF KNOWLEDGE, THEN A LEAP TAKEN.

D.H. LAWRENCE

INTERNSHIPS

OUR MAIN FOCUS

Six economist technicians went to Kecser law firm, DWS Kft. digitalization company and CEZ energy company.

Kecser law firm provides a wide range of legal services, most notably corporate law, debt settlement, insolvency, real estate law, civil law and employment law.

DWS Kft. is a key player in the document management market, making inventories and tangible assets as an outsourced activity. Its incredible work has allowed it to work with juggernauts such as OBI, Auchan and Hervis. With its skills in bookkeeping, records management, records storage, digitization, and data processing, it's truly a firm to keep in mind.

CEZ is one of the largest energy company groups in the region. It's been in the hungarian electricity trading market since 2005. After 2009, they've switched their strategy from wholesale-focused activities to making big deals with even bigger customers.

Stronger together!

EXPLORING HUNGARIAN CULTURE

Almost everyday we spend time together as a group, exploring the city, building bonds and having tons of fun, while also having plenty of time in the day for our own private endeavors.

INTERNSHIPS

OUR MAIN FOCUS

9 advertisement technicians were sent to ITQ Magyarország, which provides customized IT services to business customers big and small, with the use of personalised managed software, which the firm can also develop for its customers. They've been involved in work with various media related to animation and sound, such as stop-motion animation and morph animation, which can then be edited together with sound recorded using professional voice recorders.

Reinventing ourselves

BLOWING UP WITH NEW IDEAS

Making collages by hand, scanning them and turning them into posters, then animating them.

Our advertisement technicians' creativity knows no bounds and was able to blossom at the internship thanks to their incredible tutors, who opened their eyes to new ideas, taught them animation from 0, helped record audio samples and most of all - work together as a team to become one strong unit.

Rising up the charts

PROFESSIONALS IN THE MAKING

While the advertisement technicians are making colorful creations, the economist technicians don't have time for playing around. When they go to work, you won't be disappointed. They handle it all. From digitalising documents to inserting invoices to the operating system and managing mail. Is there anything these economist technician soldiers can't do?

Fun of the smus era

SOMETHING FOREVER

Our Erasmus+ internship is leaving us with many beautiful memories filled with fun and comradery. Whether you went to see the pope, explored the city, or took in the views of the japanese garden on St. Margaret island, rest assured, you will return home richer in memories of an incredible experience.

OUR MENTORS, THANK YOU!
